

Priority Groups

When additional vaccine arrives, the CDC recommends that medical providers give priority for the vaccine to certain target groups:

- **Pregnant women**
- **Caretakers of infants under six months old**
- **Children and young adults six months to 24 years old**
- **Adults 25 to 64 years old with underlying medical conditions**
- **Health care workers.**

If you do not fit within the above target groups you will most likely not receive a H1N1 vaccine until the supply of vaccine increases. Based on the information we are receiving from the state and federal authorities, we anticipate that there will be sufficient vaccine available for everyone who wishes to be vaccinated in the coming months.

County Public Health Centers

There are six County Public Health Centers and one County Immunization Clinic. These seven locations are located throughout San Diego County. There are different types of H1N1 vaccine. We are limited in the types of vaccine we now have left to distribute. We currently only have **LIMITED VACCINE AVAILABLE FOR PREGNANT WOMEN, CHILDREN 2-18 YEARS OLD WITHOUT CHRONIC MEDICAL CONDITIONS, and HEALTHY CAREGIVERS (19-49 YEARS OLD) OF INFANTS LESS THAN SIX MONTHS OLD.**

Hours

Beginning Wednesday, October 28 County Public Health Centers will be open from 8:00 a.m. to 5:00 p.m., offering routine services according to schedules in each region.

(Subsequent hours will be determined based on demand. For more info, visit www.sdiz.org or call 2-1-1.)

You are encouraged to call your primary care provider to get an H1N1 Influenza vaccine. If your primary care physician did not order vaccine or you do not have a primary care doctor, H1N1 vaccine can be obtained at the below locations:
